

SIM-SERV Strengthens Offering for Rubber & Plastics Sector

Elastopoli Oy, a Finnish services company has joined SIM-SERV Supplier Group. Elastopoli provides a variety of expert services for rubber & plastics manufacturers. Elastopoli has strong track record in applying simulation to solve problems of plastics manufacturers.

Elastopoli has optimised the design of variety of molds using virtual simulation of the production process. According to Managing Director Timo Ture savings are typically 20-50 % of production costs depending on the product and the type of simulation.

Elastopoli has close co-operation with Tampere University of Technology to further develop the enabling technologies and to ensure reliable material data for simulations. Elastopoli also participates in software development.

Elastopoli serves customers in English, Finnish, Swedish, German, French and Spanish languages. Elastopoli's customers include Nokia and Perlos.
